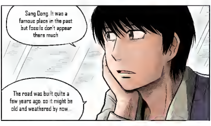
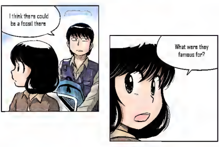
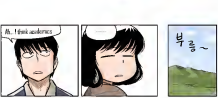
Where are we going?
SFX. Vroooom



Sang Dong. It was a famous place in the past but fossils don't appear there much
The road was built quite a few years ago, so it might be old and weathered by now...



I think there could be a fossil there
What were they famous for?



Ah... I think academics

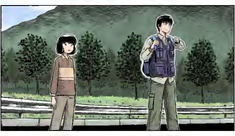
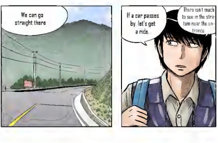
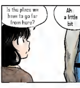
This is the last station



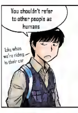


We can go straight there
If a car passes by, let's get a ride.
There isn't much to see in the stratum near the entrance



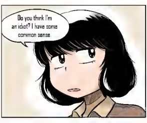
Is the place we have to go far from here?
Ah a little bit

Ah, right, and

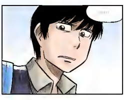


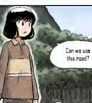
You shouldn't refer to other people as humans
Like when we're riding in their car

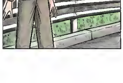
Don't be rude to adults and speak politely



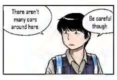
Do you think I'm an idiot? I have some common sense.







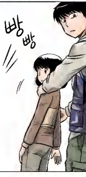
Can we use this road?

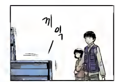


There aren't many cars around here.
Be careful though

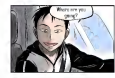
The road was built well.

SFX: Honk honk

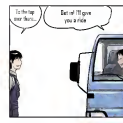




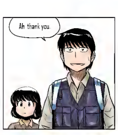
SFX: Creak



Where are you going?

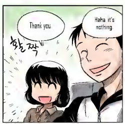


To the top over there...
Get in! I'll give you a ride



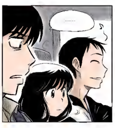
Ah thank you.

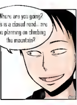
SFX: Close



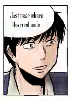
Thank you
활짝
Haha it's nothing

SFX: Smile

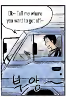




Where are you going? This is a closed road... are you planning on climbing the mountain?

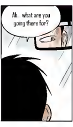


Just near where the road ends

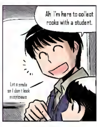


Ok~ Tell me where you want to get off~
부앙~

SFX: Vroooom

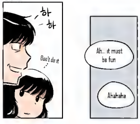


Ah... what are you going there for?

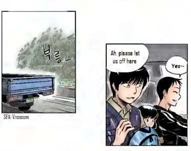


Ah. I'm here to collect rocks with a student.
Let's smile so I don't look suspicious

SFX: Haha

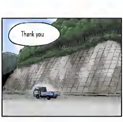


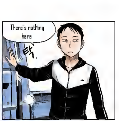
하
하
Don't do it
Ah... it must be fun
Ahahaha



부릉
Ah, please let us off here
Yes~

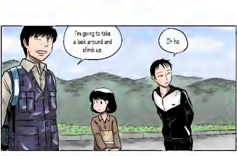
SFX: Vroooom



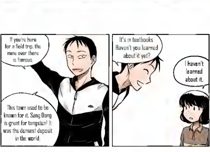


There's nothing here
탁

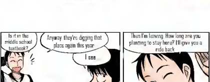
SFX: Close



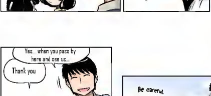
I'm going to take a look around and climb up
Oh ho



If you're here for a field trip, the mine over there is famous.
This town used to be known for it. Sang Dong is great for tungsten! It was the densest deposit in the world.
It's in textbooks Haven't you learned about it yet?
I haven't learned about it.



Is it in the middle school textbook?
Anyway they're digging that place again this year
I see...
Then I'm leaving. How long are you planning to stay here? I'll give you a ride back



Yes... when you pass by here and see us...
Thank you
Be careful

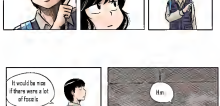
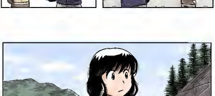
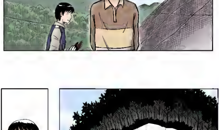
TN: A terrane boundary is a piece of the earth's crust. In some cases, it's a stratum that was detached from the plate,and got transported, but doesn't fit properly causing it to go under/over certain plates, resulting in faults and sutures. It contains genetic material from fossils and can be used to determine the specific time/era.

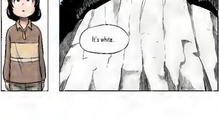


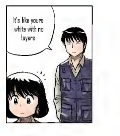
...This stratum is older than the one before. There should be a fossil which we can identify the time period from... The Mid-Cambrian period to the latter part of the period the terrane boundary...
?



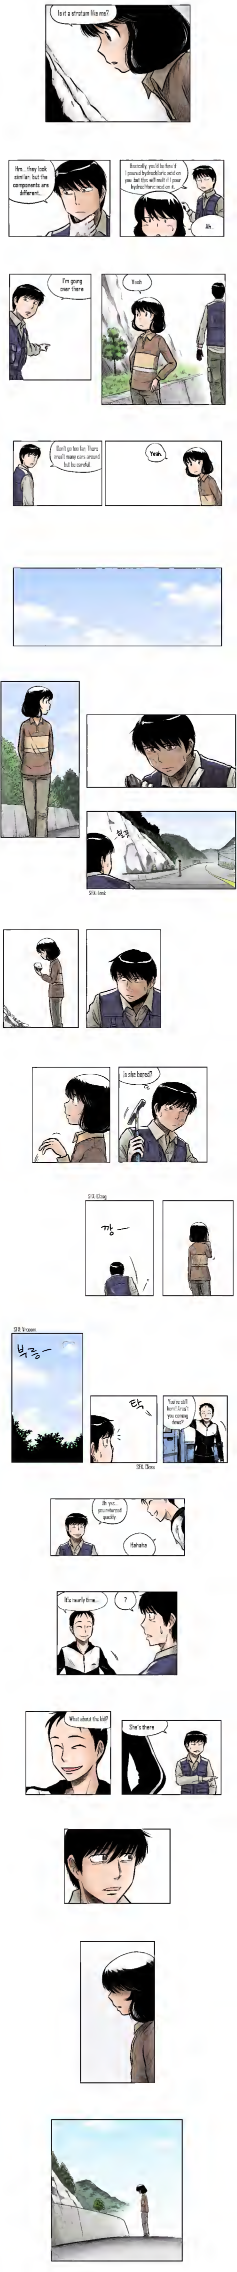
It would be nice if there were a lot of fossils
Hm







It's like yours white with no layers



Is it a stratum like me?
Hm... they look similar, but the components are different...
Basically, you'd be fine if I poured hydrochloric acid on you, but this will melt if I pour hydrochloric acid on it.
Ah...
I'm going over there
Yeah
Don't go too far. There aren't many cars around but be careful.
Yeah.

SFX: Look
Is she bored?

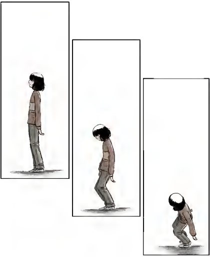
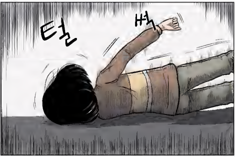
She's there





SFX: Fall down
